

## SUSTAINABLE DEVELOPMENT

Turtle Mountain School Division supports Manitoba Education’s vision for Education for a Sustainable Future:

“Education for Sustainable Development involves incorporating key themes of sustainable development – such as poverty alleviation, human rights, health and environmental protection, climate change – into the education system. ESD is a complex and evolving concept and requires learning about key themes from a social, cultural, environmental and economic perspective and explores how those factors are inter-related and inter-dependent. Students will become informed and responsible decision makers, playing active roles as citizens of Canada and the world, and will contribute to social, environmental and economic well-being and an equitable quality of life for all, now and in the future.”

The Division supports this vision through its policies, procedures and day-to-day operations. Sustainable Development programming in schools will be interwoven throughout classroom and school activities, and in accordance with the Division Strategic Plan as well as school plans.
