

EDUCATION ACCESS

All students in Turtle Mountain School Division are entitled to have timely access to an education. Some students will require accommodations, adaptations, curriculum modifications and individualized programming to enable and improve learning.

A new student who requires additional supports will receive educational programming within two weeks.

School placement outside of the catchment school will be determined collaboratively by the school team and parent(s)/legal guardian(s), and will be reviewed annually or as student needs warrant.

Cumulative files of students transferring outside the school division will be forwarded within one school week of receiving the request from the new school.

All school activities will be planned to be safe and as accessible as possible for all students.
