ENRICHMENT PROGRAMMING

The Board supports enrichment programming in school which extends existing curricula in order to meet the needs of individual students and promote student engagement. Students should be provided opportunities for enrichment in a number of ways, including but not limited to:

1. Extending the curriculum in depth and breadth
2. Developing and broadening students' interests
3. Providing opportunities to develop critical thinking skills as well as creativity, citizenship, character, and communication
4. Development of research skills
5. Creating opportunities for collaboration
