

ACCEPTABLE STUDENT AND STAFF USE OF INFORMATION AND COMMUNICATION TECHNOLOGY

Turtle Mountain School Division recognizes that new technologies can enhance learning environments by providing students with new and exciting ways to create, collaborate, communicate, and think critically. The purpose of this policy and accompanying procedure is to establish guidelines and responsibilities related to the student and staff use of the TMSD network, devices, and facilities owned and operated by TMSD. It also applies to personally-owned devices used to access the Division network. TMSD is committed to ensuring that interactions using ICT contribute positively to school climate as well as the community outside of school.
